

Distribution of Medication Policy

LANGWARRIN PARK PRIMARY SCHOOL

Rationale:

- Teachers and schools are often asked by parents to administer medication for their children while at school. It is important that that requests are managed in a manner that is appropriate, ensures the safety of students, and fulfils the duty of care of staff.

Aims:

- To ensure the medications are administered appropriately to students in our care.

Implementation:

- Children who are unwell should not attend school.
- The First Aid Officer, whenever possible, is the agreed the staff member responsible for administering prescribed medications to children.
- Non-prescribed oral medications (eg: headache tablets) will only be administered by school staff where the parent has provided written permission and discussion with the parents has been undertaken by the First Aid Officer.
- All parent requests for the First Aid Officer to administer prescribed medications to their child must be in writing on the form provided and must be supported by specific written instruction from the medical practitioner or pharmacist's including the name of the student, dosage and time to be administered (original medications bottle or container should provide this information).
- All verbal requests for children to be administered prescribed medications whilst at school must be directed to the First Aid Officer, who in turn, will seek a meeting or discussion with parents to confirm details of the request and to outline school staff responsibilities.
- Requests for prescribed medications to be administered by the school 'as needed' will cause the First Aid Officer to seek further written or verbal clarification from the parents/carers.
- All student medications must be in containers, must be labelled, must have the quantity of tablets confirmed and documented, and must be stored in either the locked office first aid cabinet or office refrigerator, whichever is most appropriate.
- Consistent with our Asthma policy, students who provide the school with written parent permission supported by approval of the Principal may carry an asthma inhaler with them. A spare inhaler and space provided by the family is to be kept in the First Aid office in case of loss.
- Classroom teachers will be informed by the First Aid Officer of prescribed medications for students in their charge, and classroom teachers will release students at prescribed times so that they may visit the school office and receive their medications from the First Aid Officer.
- All completed Medication Request Forms and details relating to students, their prescribed medication, dosage quantities and times of administering will be kept and recorded in a confidential register located in the First Aid office by the First Aid Officer with the knowledge of the Principal Class officers and key Administration staff.
- Students involved in school camps or excursions will be discreetly administered prescribed medications by the 'Teacher in Charge' in a manner consistent with the above procedures, with all details recorded on loose-leaf pages from the official medications register. Completed pages will be returned to the official medications register on return of the excursion to school.
- Parents/carers of students that may require injections are required to meet with the Principal to discuss the matter.

Evaluation:

- This policy will be reviewed as part of the school's three-year review cycle.
